

PUBLIC REALM WORKS – BRIERLEY HILL, WEST MIDS

Part funded by the ERDF, this project comprised a range of public space enhancement works resulting in a more defined, attractive and accessible communication and transport links. New steps, footpaths, canal towpaths, pedestrian crossings and cycle ways together with new street furniture and signage were introduced over a wide area.

Security and amenity were enhanced by the introduction of new CCTV and lighting. Existing landscaping was upgraded with grassed areas and mature tree planting. Liaison with British Waterways throughout the project ensured that there was minimal disruption to canal users and that new works were sympathetic to the canal's heritage.
